

Circular Solutions Advisors

CORE COMPETENCIES AND CAPABILITIES

CSA is founded on the premise that organizations can do good for the planet AND their business. Most organizations want to make a positive impact in the world—and many start by recycling. But with more than 20 years of experience managing the waste ecosystem, we know that often, even the best efforts are just not working.

CIRCULAR ECONOMY SOLUTIONS

• Recycling Value Assessment (RVA)

- Real recycling solutions that divert material from landfills which saves you money and lowers your carbon footprint.

• Business Community Recycling

- Large-scale programs that connect a city's businesses to their community through recycling.

• Real Recycling Certification Program

- Validation that your recyclable materials are actually being recycled.

• Environmental and Sustainable Business Solutions

- Develop action plans that create sustainable solutions to complex challenges and leads to sustainable return on investment.
- Optimize architectural design of waste and recycling schematics to achieve maximum landfill diversion for sports and entertainment venues.

• Measurement and Scorecard Capabilities

- Circularity, Green House Gas Reduction, and potential Financial Savings.

• Public Affairs and Communications

- Sustainability Reports and a storytelling tool kit for media and public relations.

• Experiential Recycling Event Activation and Gamification

- Execute immersive, engaging, and memorable events.

• Commodity Trading and Benchmarking Reports for PET and Aluminum

- CSA facilitates the trading of commodities to processors that upcycle and recycle PET and ALU.

• Grant Identification and Writing

- Identify and secure grants to support sustainability innovation and growth initiatives.

• Sales and Marketing of Sustainability Solutions

- Serve as sales and marketing team for strategic partners.
