

Circular Solutions Advisors

WHAT IS AN RVA?

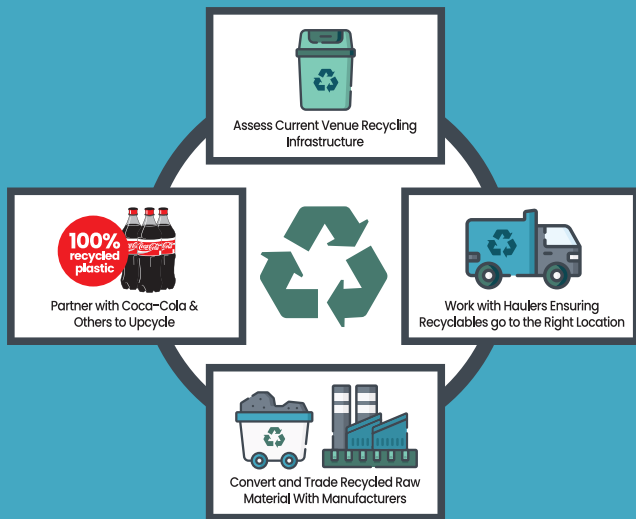

A **Recycling Value Assessment (RVA)** is an independent evaluation of properties' waste and recycling programs aimed at generating additional sustainability value and cost savings.

CERTIFYING CIRCULAR ECONOMIES

SUPPLY CHAIN TRANSPARENCY

- When you put bottles, cans, or cardboard into a recycling bin, they get recycled, right?
- Most of the waste that properties think they're recycling ends up in landfills.

CSA provides real recycling solutions that diverts material from landfills which saves money for our clients and lowers their carbon footprint.

CSA validates and CERTIFIES a property as truly recycling.

PET CERTIFICATION

UBC CERTIFICATION

- Platinum Certification (Upcycling): Beverage containers at this property are certified to be part of a circular economy because they can return as food grade packaging.
- Gold Certification (Recycling): Beverage containers at this property are certified to be part of a closed loop recycling process.

RVA 6-STEP PROCESS

Pre-Call
30 Minutes (Free)
Align on Objectives

On-Site Visit
2-4 Hours
Customer Attendance Required

Track the Trash
6-8 Weeks
Establish Circularity

Customer Meetings
(Two) One-Hour Meetings
Develop and agree on Action Items

Action Items
1 Year - Follow-up Meetings
Flexible, based on customer need

Activate & Inspire
Scorecard
Measurement of progress against action items
